

Continuous validation of your security

Undoubtedly, you have the security of your ICT systems in order. Various tools protect your network against possible intruders.

However, your ICT environment is constantly changing, for example through patches and updates. How can you be sure that your network, applications and data are just as secure as when your tools were originally implemented?

Also, security certification often obliges you to continuously validate your ICT security.

What do we offer?

We offer Security as a Service (SaaS). A combination of an advanced software solution and services with which we de-stress you completely.

Our Breach and Attack Simulation tools offer a safe way to test your security. Possible vulnerabilities are detected before intruders do. We use Keysights Threat Simulator, which is based on the MITRE ATT&CK framework. Software agents use known exploits and techniques to see if your ICT environment is secure.

Think of it as a practice session for your security tools so you can evaluate their effectiveness, address weaknesses and optimize your tactics for optimal security.

We can configure this software for your environment, create reports and make recommendations to improve your security. By doing so, the evaluation hardly takes any effort on your part.

Scanning

- ✓ Pre-deployment assessment
- ✓ Thread Simulator cloud
- ✓ Deploy agents
- Configure and run scenarios
- Analyze results
- Reporting
- Actioning and recommendations

Secure

- ✓ Pre-deployment assessment
- ✓ Thread Simulator cloud
- ✓ Deploy agents
- ✓ Configure and run scenarios
- ✓ Analyze results
- ✓ Custom reporting
- Actioning and recommendations

Protector

- ✓ Pre-deployment assessment
- ✓ Thread Simulator cloud
- ✓ Deploy agents
- ✓ Configure and run scenarios
- ✓ Analyze results
- ✓ Custom reporting
- ✓ Customized actioning plan and recommendations

What is the pricing?

The costs depend on the requested service level and the number of agents needed.

How many agents you need depends on your ICT environment and requirements.

We offer three service levels which are described above.

- **Scanning support**
starting at € 4,250 per year
- **Secure support**
starting at € 6,800 per year
- **Protector support**
starting at € 12,000 per year
